

IBM Computing Summer School

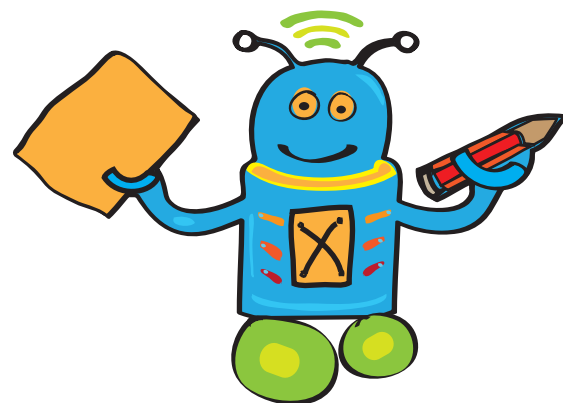

Mon 20th
to Wed 22nd
June 2016

Manchester 2016

At IBM Manchester Lab

Join the third IBM Computing Summer School at Manchester Lab. This highly popular course was awarded

a Lord Mayor's Dragon Award for Education and Lifelong Learning in 2015.

The course is aimed at teachers with a responsibility for computing in school. It will be delivered by **IBM professionals** alongside teachers from the award winning **London Connected Learning Centre**. The course will help teachers to:

- explore effective ways to support colleagues in teaching computing
- better understand the computing programmes of study get to grips with assessment and progression
- develop imaginative and creative ways to embed computing into the curriculum

The programme will explore the principles of computational thinking, digital literacy, online safety and information systems within real world contexts, including IBM's commercial and social programmes. All those taking part in the summer school will be offered an IBM mentor to provide ongoing support.

'I definitely feel more confident in my abilities as subject leader. The programme has really helped me to develop my skills and understanding and my focus now is to pass this on to colleagues in school. I use the network of teachers all the time now and often get in touch with the contacts I made over the duration of the course to ask for help and advice. It's helped me understand the application of computing and computer science in the real world. Thanks so much for letting us be a part of this great project'

Computing Subject Lead, Granton Primary

The cost of the course is £100 which include resources, materials and meals. To apply please complete the [form](#)
